

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Art Unit : 1625  
Examiner : P. Morris  
Applicant(s) : Arthur G. Romero  
Serial Number : 09/313534  
Filed : May 13, 1999  
For : Heterocyclic Amines Having Central Nervous System Activity

**RECEIVED**

DEC 11 2000

TECH CENTER 1600/2900

Commissioner of Patents and Trademarks  
Washington, DC 20231

**Communication**

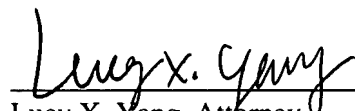

Sir:

The present application is a CPA of a reissue application filed on May 13, 1999, which was a broadening reissue filed within two years from the grant of the original patent.

During the telephone conversation with Examiner, Patricia Morris, dated December 4, 2000, it was agreed that the filing of the present CPA, after two years from the grant of the original patent would have no impact on the applicant's right to enlarge the scope of Claims, that are the subject of the instant reissue.

In the Final rejection to the reissue application, 09/313,534, dated July 21, 2000, the Examiner stated that the Oath/Declaration was defective. Applicant hereby submits a substituted Oath/Declaration to replace the original reissue Oath/Declaration. Applicant believes that the new Oath/Declaration has cured all the defects raised by the Examiner in her Final rejection to the above referenced reissue application. Therefore, applicant believes that the reissue is in condition for allowance. Should the Examiner still reject for the reason of defective Oath/Declaration, applicant respectfully requests that the Examiner point out specifically the defects, and provide a detailed explanation rather than citing boiler plate language.

Respectfully submitted,
